

New Market Project

Fact Sheet

New Market Project Purpose and Description

Dominion Transmission, Inc. (DTI) has proposed the [New Market Project](#) to improve access to natural gas for customers in upstate New York. The project will allow the delivery of additional supplies of natural gas to National Grid distribution areas to meet the growing consumer demand for the fuel. The New Market Project's total cost is expected to be about \$159 million and will add approximately 33,023 horsepower of compression to DTI's existing interstate pipeline transmission system.

DTI will file in June 2014 an application for a Certificate of Public Convenience and Necessity with the Federal Energy Regulatory Commission (FERC), the agency responsible for reviewing and authorizing interstate natural gas transmission projects. FERC will conduct a full review of the project under its regulations in compliance with two federal statutes, the Natural Gas Act and the National Environmental Policy Act.

About Dominion Transmission

Dominion Transmission, Inc. is a provider of gas transportation and storage services and operates more than 7,300 miles of interstate pipeline in six states: Ohio, West Virginia, Pennsylvania, New York, Maryland and Virginia. DTI also operates one of the nation's largest natural gas storage systems, with approximately 762 billion cubic feet of storage capacity. DTI is a subsidiary of Dominion, one of the nation's largest producers and transporters of energy.

Proposed Project Schedule

Milestone	Target
Filed FERC Application	June 2014
Received FERC Certificate	April 2016
Begin Construction	TBD
Project In-service	TBD

Proposed Project Facilities

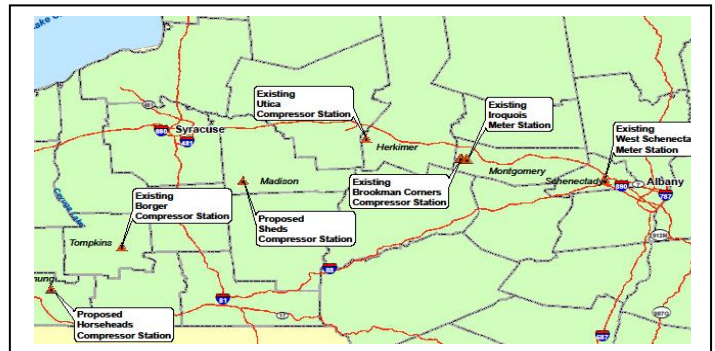

The project will include the addition of two new compressor stations along DTI's existing transmission pipeline. It will also include increasing compression at an existing station; adding or upgrading other metering and regulating (M&R) facilities; and adding gas coolers at DTI's existing Borger, Utica and Brookman Corners stations.

New Compressor Stations:

- **Madison County, Town of Georgetown**
 - 10,880 hp of new compression
- **Chemung County, Town of Veteran**
 - 11,010 hp of new compression

Existing Compressor Station Improvement:

- **Montgomery County, Town of Minden**
 - 11,133 hp of additional compression at Brookman Corners Station
