Re: Approval to Introduce Fuel Gas to Commission the HF-LF Flare Pilot System

Dear Ms. Francis:

I grant your December 31, 2018 request for Elba Liquefaction Company, L.L.C. and Southern LNG Company, L.L.C. (collectively referred to as “Companies”) to proceed with introduction of fuel gas to commission the HF-LF flare pilot system. The information filed is consistent with Environmental Conditions 12, 76, and 78-84 of the Commission’s June 1, 2016 *Order Granting Section 3 and Section 7 Authorizations* (Order) in the above-referenced docket. This approval is based on review of the information filed on December 31, 2018 and January 31, 2019 as well as FERC staff inspections of the applicable facilities.

I remind you that the Companies must comply with all applicable remaining terms and conditions of the above referenced Order, as well as procedures stipulated in your previous filings. We also note that the Companies must also comply with any applicable Department of Transportation requirements under 49 CFR 193.

Please note that this approval does not grant the Companies the authority to introduce hazardous fluids to other project facilities at the LNG terminal. Additional authorizations will be released once the Companies have demonstrated full compliance

with the conditions of the Order. If you have any questions regarding this approval, please contact Karla Bathrick at (202) 502-6328.

Sincerely,

on behalf of

Hugh Thomas
Chief, LNG Branch 2
